## **DETAILED ACTION**

### ***Response to Amendment***

The amendment filed on February 5, 2004 has been considered and an action on the merits follows.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. As noted in the previous Office Action, the claim fails to positively recite the critical interrelationships between the elements. For example, the claim fails to positively recite any mechanical structure between the slide and the single adjusting means and only recites a function of the single adjusting means as it relates to the slide. Examiner suggests —*said single adjusting means operatively connected to---*.

Additionally, regarding claim 1, the preamble states, “a slide driving device for a press machine”, however the claim fails to positively recite any driving device.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3725

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-5 and 7 are rejected under 35 U.S.C. 102(a) as being anticipated by Itakura as noted in the previous Office Action.

***Allowable Subject Matter***

Claims 16-18 are allowed.

Claims 6, 8-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims and if any 35 U.S.C. 112 rejections were overcome.

***Response to Arguments***

Applicant's arguments have been carefully considered. Applicant's arguments with regard to claims 6 and 16-18 are persuasive and according the rejection(s) regarding claims 6 and 16-18 are withdrawn.

As it relates to claims 1-5 and 7, Applicant argues that Itakura fails to show a single adjusting means, "*permitting an adjustment of a stroke of said slide*" and that the prior art reference Itakura instead "*...adjusts the die height H*". This argument is not found persuasive, because the prior art reference, Itakura discloses a single adjusting means (21) operatively associated/connected to a slide (2), which is operatively connected to a die (H). In adjusting the die height, because the die is directly placed on the slide, the slide stroke must also be adjusted. Consequently, Itakura's adjusting means (21) inherently adjusts the stroke of the slide when adjusting the die height. Accordingly the rejection is deemed proper and remains.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
